

PRODUCT DESCRIPTION

The mountable Solar LED Wall Light is a great option for many landscaping applications. This product is at home lighting up walkways. Before detecting motion, the light will put out a dim ambient glow to illuminate the presence of the walkway. Upon detecting motion, the light will brighten to allow the safe use of sidewalks and staircases. The Motion Wall Light mounts seamlessly into any wall, providing a worry free installation. It's easier than ever to have professional lighting without the hassle of wiring or paying for a professional electrician. These lights are equally easy to uninstall in case you decide they'd better serve you in a new location.
