

## **ELECTRIC VEHICLE CHARGING STATIONS**

**It is simple and inexpensive to have electric vehicle charging stations installed at your business.** National Grid will cover the cost of labor, and NYSERDA pays for the EV Station Equipment, with your valuable time being the only cost to you. We offer Level 2 charging station solutions that give 25-30 miles of driving range per hour of charging time.

**National Grid & NYSERDA  
require that the customer  
provide charging to the  
public for 5 years after  
installation, managed by  
The Green Team**

---

**Electrical upgrades,  
protective bollards,  
concrete, excavation,  
parking space painting,  
signage, and lighting – all  
covered and included**

---

**2x station minimum to  
qualify for National Grid  
and NYSERDA incentive  
money**

---

**Monetize your stations to  
cover electricity costs**

---

**The Green Team handles  
all incentive and grant  
paperwork preparation  
for you. After providing  
some business info, two  
rounds of approvals get  
you charging in no time!**
